

The setting up or refurbishing of a pharmacy or perfumery requires planning and coordination. This is not an ordinary retail outlet and as such requires a supplier who knows the business and is able to offer purpose built furniture and fixtures, maximum functionality, segregation for restricted medicines as well as shelving and units that compliment the rotation of inventory.

SAW Ltd is a leading manufacture of quality bespoke furniture and in-tandem with a number of specialist European suppliers has over the past years installed a number of pharmacies and perfumeries in the Maltese islands as well as in other European cities. SAW Ltd can supply a variety of custom-built or modular units and complimentary accessories for your project irrespective of whether you are planning a pharmacy, perfumery or other retail outlet.

At SAW, we do not limit your creativity, our ability and experience open up endless possibilities. Our objective is to add value to your business.
